

8/A

In claim 10, line 1, please delete "8", and substitute therefor --1--.

5 11. (Amended) A method of forming an intraluminal device comprising the steps
of:

providing an elongate [radial] radially expandable tubular stent;

cu 2 forming a stent cover from a longitudinal segment of unsintered ePTFE having a first longitudinal expanse and a transverse expanse, [said stent cover being expandable in a first direction; and]

expanding said segment along said transverse expanse to provide a second transverse expanse greater than said first transverse expanse and a second longitudinal expanse less than said first longitudinal expanse; and

applying said [stent cover] expanded segment about said stent, with said [first direction] second transverse expanse extending [transverse to] longitudinally along said elongate stent.

In claim 13, ~~line 3~~, please delete "edges" and substitute therefor --longitudinal ends--.

In claim 14, ~~line 2~~, please delete "edges" and substitute therefor --longitudinal ends--.

In claim 15, line 2, please delete "edges" and substitute therefor --longitudinal ends--.
